

Geoffrey Miller

AI & Agentic Engineering

Phoenix, AZ | geoffmiller.cloud | linkedin.com/in/geoff-e-miller | github.com/GeoffMillerAZ

SUMMARY

Infrastructure Director and Principal Cloud Architect with 12 years designing and operating cloud platforms at regulated FinTechs (20 years in IT). Builds high-performing platform teams, manages stakeholders across business and technology, and ships simple repeatable engineering patterns that cut spend 30%+ while tightening compliance. Advanced leader in agentic software engineering - ships controlled agentic layers using MCP servers, patterned agents, and automated verification with competing incentives.

EXPERIENCE

PayPal

10/2025 - Present

Sr. Engineering Manager, SRE (AI Platform Architecture & Agentic Orchestration)

Scottsdale, AZ

- Lead and specialize in agentic software engineering: full spec-driven development with AI-augmented and automated code, quality and intent reviews behind controlled approval gates.
- Built the expert systems Command Center duty officers query during live incidents, grounded in service code, infrastructure- and config-as-code, telemetry, docs and playbooks, for investigation and mitigation recommendations.
- Built real-time incident management and collaboration tooling that speeds up live P0/P1 incident recovery.
- Built a risk inventory system mapping mitigation capabilities and auditing reliability readiness across all PayPal brands.
- Authored GameDay tooling that ingests incident logs and chat transcripts to generate agentially-scored readiness feedback.
- Member of PayPal's AI Super Users group, setting policy and direction for enterprise AI use and previewing new tools and models ahead of rollout.

First Citizens Bank

07/2021 - 09/2025

Director of Cloud Infrastructure

Tempe, AZ

- Architected and delivered a secure multi-account AWS Landing Zone (100+ accounts) with centralized logging, IAM federation, and policy-as-code guardrails enabling 30+ product teams.
- Led FinOps program; reduced AWS spend 30% year-over-year via dashboards, automated rightsizing, and savings-plan optimization.
- Architected event-driven, claim-based lifecycle control for non-production environments - environments default off and activate against bounded, self-expiring claims instead of fixed shutdown schedules - cutting non-production spend 70%+.
- Replaced thousands of duplicate VPC interface endpoints with a single multi-AZ endpoint hub - a top-3 line item -> negligible.
- Designed hybrid connectivity with AWS Direct Connect, Azure ExpressRoute, and Megaport for sub-5ms latency.
- Guided the team through the Silicon Valley Bank -> First Citizens Bank integration, including platform migrations.

REPAY (Realtime Electronic Payments)

10/2017 - 07/2021

Director of Cloud Infrastructure

Tempe, AZ

- Built green-field AWS platform with Terraform, Packer, and Kubernetes; passed PCI-DSS audit with zero critical findings.
- Launched Backstage Internal Developer Platform and Documentation-as-Code; cut documentation drift 75%.
- Grew infrastructure and SRE organization from 1 engineer to 18 across SRE, ops, and platform development.
- Established FinOps automation cutting AWS spend 30% year-over-year.
- Built the first version of environment claims - non-production stacks defaulted off and came up against a bounded, self-expiring claim.
- Built reusable landing-zone patterns reducing cloud migration onboarding from months to a single day.

EARLIER EXPERIENCE

DevOps Engineer (Contract) - Early Warning Services (Zelle) (01/2017 - 10/2017)

Principal Cloud Architect - ThinkVine (07/2016 - 01/2017)

Lead DevOps Engineer - OWNZONES Media Network (04/2016 - 07/2016)

Applications Developer - State of Arizona, Dept. of Administration (01/2015 - 04/2016)

Undergraduate and Graduate Teaching Assistant - Northern Illinois University (01/2012 - 01/2015)

Mainframe Technical Analyst Intern - Bank of America (06/2013 - 08/2014)

Help Desk Manager - Universal Technical Institute (01/2010 - 12/2010)

Help Desk Manager - J-Curve Technologies (01/2009 - 01/2010)

Systems Support Analyst - Bank of America (01/2006 - 01/2009)

Desktop Repair - Geek Squad (01/2001 - 01/2006)

SKILLS

- Agentic Engineering & MCP
- SRE & Incident Management
- Platform Engineering
- Kubernetes / CNCF
- DevSecOps & Policy-as-Code
- GitOps & IaC (Terraform / Pulumi)
- Cloud Architecture (AWS primary)
- FinOps & Cloud Cost Optimization
- Compliance (FFIEC / PCI-DSS / SOC 2)
- Team Leadership & Mentoring

EDUCATION

Northern Illinois University, M.S. Computer Science | 01/2015

Northern Illinois University, B.S. Computer Science | 01/2013

GPA: 3.75

CERTIFICATIONS

- Claude Certified Architect - Foundations (Anthropic) [IN PROGRESS]
