

Geoffrey Miller

Platform Engineering & Cloud

Phoenix, AZ | geoffmiller.cloud | linkedin.com/in/geoff-e-miller | github.com/GeoffMillerAZ

SUMMARY

Infrastructure Director and Principal Cloud Architect with 12 years designing and operating cloud platforms at regulated FinTechs (20 years in IT). Builds high-performing platform teams, manages stakeholders across business and technology, and ships simple repeatable engineering patterns that cut spend 30%+ while tightening compliance. Advanced leader in agentic software engineering — ships controlled agentic layers using MCP servers, patterned agents, and automated verification with competing incentives.

EXPERIENCE

PayPal

10/2025 – Present

Sr Engineering Manager, SRE

Scottsdale, AZ

- Lead and specialize in agentic software engineering — mostly-automated development with controlled approval gates.
- Ship agentic code and configuration review tools with automatic approval-recommendation gates for the Command Center.
- Built real-time incident management and collaboration tooling that speeds up live P0/P1 incident recovery.
- Built a risk inventory system mapping mitigation capabilities and auditing reliability readiness across all PayPal brands.
- Authored GameDay tooling that ingests incident logs and chat transcripts to generate agentially-scored readiness feedback.
- Recognized as a top-impact AI user enterprise-wide; appointed to PayPal's AI Super Users community.

First Citizens Bank

07/2021 – 09/2025

Director of Cloud Infrastructure

Tempe, AZ

- Architected and delivered a secure multi-account AWS Landing Zone (100+ accounts) with centralized logging, IAM federation, and policy-as-code guardrails enabling 30+ product teams.
- Led FinOps program; reduced AWS spend 30% year-over-year via dashboards, automated rightsizing, and savings-plan optimization.
- Replaced thousands of duplicate VPC interface endpoints with a single multi-AZ endpoint hub — a top-3 line item → negligible.
- Designed hybrid connectivity with AWS Direct Connect, Azure ExpressRoute, and Megaport for sub-5ms latency.
- Guided the team through the Silicon Valley Bank → First Citizens Bank integration, including platform migrations.
- Led and mentored a 12-member cloud platform engineering team; founded the Cloud Community of Practice.

REPAY (Realtime Electronic Payments)

10/2017 – 07/2021

Director of Cloud Infrastructure

Tempe, AZ

- Built green-field AWS platform with Terraform, Packer, and Kubernetes; passed PCI-DSS audit with zero critical findings.
- Launched Backstage Internal Developer Platform and Documentation-as-Code; cut documentation drift 75%.
- Grew infrastructure and SRE organization from 1 engineer to 18 across SRE, ops, and platform development.
- Established FinOps automation cutting AWS spend 30% year-over-year.
- Built reusable landing-zone patterns reducing cloud migration onboarding from months to a single day.
- Deployed Prometheus / Loki / Grafana observability stack with 24/7 PagerDuty on-call.

EARLIER EXPERIENCE

DevOps Engineer — Early Warning Services (Zelle) (01/2017 – 10/2017)

Principal Cloud Architect — Thinkvine (04/2016 – 01/2017)

Lead DevOps Engineer — OWNZONES Media Network (04/2016 – 07/2016)

Applications Developer — State of Arizona, Dept. of Administration (01/2015 – 04/2016)

SKILLS

- Platform Engineering
- Cloud Architecture (AWS primary)
- Kubernetes / CNCF
- FinOps & Cloud Cost Optimization
- GitOps & IaC (Terraform / Pulumi)
- SRE & Incident Management
- DevSecOps & Policy-as-Code
- Agentic Engineering & MCP
- Team Leadership & Mentoring
- Compliance (FFIEC / PCI-DSS / SOC 2)

EDUCATION

Northern Illinois University, M.S. Computer Science | 05/2015

Northern Illinois University, B.S. Computer Science | 05/2013

GPA: 3.75

CERTIFICATIONS

- Claude Certified Architect — Foundations (Anthropic) [IN PROGRESS]
